
360° TOTALSCRUB TANK CLEANING SYSTEM

CUT DAYS OFF VESSEL INTERIOR CLEANING

NEW PATENTED RUN-DOWN TANK CLEANING PROCESS BY RIG

Reliable Industrial Group

Product Overview

CLEAN TANKS FASTER

RIG's Tank TotalScrub System sprays oil in a 360 rotation, allowing the run-down tank interior to be simultaneously "washed" with the flushing oil.

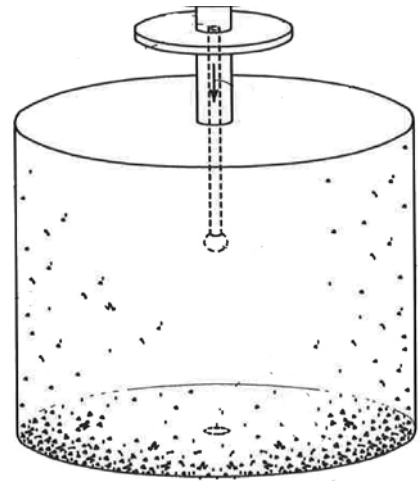

This technology allows for:

- Savings of 24-36 hours of cleaning time *per vessel*
- Concurrent high-velocity oil flushing and tank cleaning
- Complete cleaning of all interior tank surfaces
- Removal of contaminants including varnish, deposits, and sediment
- Successful cleaning of oil systems to ISO recommended levels

FEATURES:

The RIG TotalScrub System features:

- 360° rotating interior oil spray wand
- Ability to coat and clean all internal surfaces during HVOF
- Full wash-down capabilities

Our patented run-down TotalScrub tank cleaning process is exclusively used during compressor High Velocity Flushing (HVOF) services.
